Your Excellency,

The DC Section of the Young Communist League (YCL) congratulates the FSLN and the people of Nicaragua on their victory in the most recent election. The remarkable progress towards education, health, and economic equality has done much for the Nicaraguan youth. Even in the face of reactionary opposition, and the threat of economic sanctions, the working people choose democracy and social progress.

The re-election of Daniel Ortega reflects the people's determination and hope for continuing this path of liberation. Nicaragua doesn't just offer a bright future for its own citizens but offers a great alternative for the citizens of the United States and the youth who are quickly becoming disillusioned with neoliberalism and capitalist exploitation by their own government. Free healthcare and public education are just two of the promises fulfilled by the FSLN that mirror the demands of youth in the United States. The DC YCL is thankful to the people of your country for hosting our comrade (with the Friends of the ATC delegation) who saw this political, social, and economic alternative in person when observing the Nicaraguan election.

The DC Young Communist League will continue to support the Sandinista Revolution and look forwards to future opportunities where we can work together.

Long live the Revolution!

In solidarity and struggle,

SJ Knight, Sianna Ferguson, & Germán Polaco
